

# Age Rating 8

for films and apps.

## PG films

PG means 'Parent guidance' that some PG-films may not be suitable for some children, so parent must keep watching.

## U films

U = Universal = suitable for all audiences aged four years and over.

## 12A films

12A films can be watched by children younger than 12 as long as they are accompanied by an adult.

## 12 films

The 12 rated films are not supposed to be watched by a child under the age of 12.

## 15 films

S rated films should only be watched by 15 and over because they can have:  
 15 dangerous behaviour and more are not to be played by any child.

## 18 rated films

18 are for adults only they are definitely not suitable for any children! and no 18 games are suitable for kids.

games are not supposed to be played by a younger child.

# HOW TO STAY SAFE ONLINE

Youtube: You can stay safe on this by going to the Youtube safety mode then you disable Youtube app. Next, use the kids safety browser then you make sure you don't have an account unless you are 18.

Whats app: You go to your profile picture then select the account then privacy. You can also change the 'last seen' - to make people that you don't want to know you have been online or not. And you must change the profile to not ~~be~~ be your face.

X box party app: you press the x box button like:  to open the guide. Then you select system > settings > general > online safety and family. Thirdly you select one from the list then select check boxes next to data for which you're giving permission to be collected.

Roblox: first you block players using the block button, ~~then~~ then you never agree to free Roblox games, Next leave the game with multiple players are in the game, then you ban players that have impossible ~~for~~ earning items, finally take problem to Roblox, not report system.

TikTok: first go to your profile on the app then tap the 3 dots in top right and corner and press ~~a option of~~ privacy and safety.

~~First~~ Instagram: Go to your profile and then tap the menu, After tap settings then scroll down to private account and switch this to on.

Discord: first you block users so that you no longer see their messages, then go to User settings > Privacy and safety and check out the options. Then you can copy the settings listed ~~here~~ there.
