

Hughenden Primary School

Anti-Bullying Policy

This policy was adopted May 2024

The policy is to be reviewed in line with the policy schedule

MODEL SCHOOL POLICY FOR SUPPORTING PUPILS WITH MEDICAL NEEDS

- 1 Introduction
- 2 Roles and responsibilities
- 3 Staff training and support
- 4 Individual healthcare plans
- 5 The pupil's role in managing their own medical needs
- 6 Managing medicines on school premises
- 7 Record keeping
- 8 Safe storage of medicines
- 9 Disposal of medicines
- 10 Hygiene and infection control
- 11 Day trips, residential visits and sporting activities
- 12 School's arrangements for common conditions
- 13 Attendance
- 14 Liability and indemnity
- 15 Complaints
- 16 Suggested procedures for administering medicines

1 INTRODUCTION

- The Governing Body of Hughenden Primary School will ensure that all children with medical conditions, in terms of both physical and mental health, are properly supported in school so that they can play a full and active role in school life. To help achieve this, the school has adopted the Department for Education policy on “Supporting Pupils at School with Medical Conditions”, which was issued under Section 100 of the Children and Families Act 2014.
- The aim of this policy is to ensure that the parents of children with medical conditions feel confident that the school will provide effective support and that children feel safe and reach their full potential.
- Some children with medical conditions may be considered to be disabled under the definition set out in the Equality Act 2010. The school will comply with their duties under the Act to make reasonable adjustments to support pupils with disabilities.
- Some children with medical conditions may also have special educational needs (SEN) and may have an Education, Health and Care (EHC) Plan which brings together health and social care needs as well as the provision for their special educational needs. Where the child has a special educational need identified in a statement or EHC plan, the individual healthcare plan will be linked to or become part of that statement or EHC plan. The Healthcare Plan will be developed with the child’s best interests in mind to ensure that the risks to the child’s education, health and social wellbeing are managed, and minimises disruption, for children with medical conditions.
- Supporting a child with a medical condition during school hours is not the sole responsibility of one person. The school will work collaboratively with parents, pupils, healthcare professionals (and, where appropriate, social care professionals) and local authorities to ensure that needs of pupils with medical conditions are met effectively.

2 ROLES AND RESPONSIBILITIES

2.1 The **Governing Body** of Hughenden Primary School will ensure that

- arrangements are in place so that children with medical conditions
 - are properly supported;
 - can play a full and active role in school life;
 - can remain healthy and achieve their academic potential;
- staff are properly trained to provide the support that pupils need;
- in line with their safeguarding duties, ensure that pupil’s health is not put at unnecessary risk from, e.g. infectious diseases
- in those circumstances, they do not have to accept a pupil at a time where it would be detrimental to the health of that child or others to do so

2.2 The **Headteacher** will ensure that

- a person is appointed to have overall responsibility for the implementation of this policy;
- all staff are aware of the policy for supporting pupils with medical conditions and understand their role in its implementation;

- all staff including supply staff who support children with medical needs receive sufficient information to provide appropriate support;
- individual Healthcare Plans are developed, monitored and reviewed annually or earlier if evidence is presented that the child's needs have changed. Where appropriate Healthcare Plans will be reviewed at the child's Annual Review.
- sufficient staff are suitably trained and achieve the necessary level of competency before they take on responsibility to support children with medical conditions;
- sufficient numbers of trained staff are available to support all individual healthcare plans to cover staff absence, contingency and emergency situations;
- a register of children in the school is kept who have been diagnosed with asthma and/or prescribed a reliever inhaler;
- all staff are trained to recognise the symptoms of an asthma attack (and are able to distinguish them from other conditions with similar symptoms);
- at least one emergency inhaler kit is maintained and readily available in an emergency situation;
- risk assessments for school visits, holidays, and other school activities outside of the normal timetable are undertaken for children with medical conditions;
- all staff are aware that medical information must be treated confidentially;
- school staff are appropriately insured and are aware that they are insured to support pupils in this way.

2.3 Appointed Person

The Headteacher has been appointed to have overall responsibility for implementing the school's policy for supporting pupils with medical conditions. They will ensure that children with medical conditions are appropriately supported.

2.4 Transitional Arrangements

The school has made the following procedures for transitional arrangements.

- Ensuring all medical advice and healthcare plans are sent to the new school.
- Discuss any life threatening conditions directly with the school before the child starts their new school.

2.5 All members of School Staff may be asked to provide support to pupils with medical conditions, including administering medicines

- All members of staff should know what to do and respond accordingly if they become aware that a pupil with a medical condition needs help
- Although administering medicine is not part of teacher's professional duties, teachers should take into account the needs of pupils with medical conditions that they teach.
- Staff must not give prescription medication or undertake healthcare procedures without appropriate training

2.6 Pupils

- Where appropriate pupils with medical conditions will be consulted to provide information about how their condition affects them.
- will be fully involved in discussions about their medical support needs and contribute as much as possible to the development of, and comply with, their individual healthcare plan.

- 2.7 Parents** have the prime responsibility for their child's health. Parents include any person who is not a parent of a child but has parental responsibility for or care of a child.
- It only requires one parent to request that medicines are administered. As a matter of practicality, this will be the parent with whom the school has day-to-day contact.
 - Parents should provide the school with sufficient and up to date information about their child's medical needs. Parents should tell the school of any change in prescription which should be supported by either new directions on the packaging of medication or by a supporting letter from a medical professional.
 - Parents are key partners and will be involved in the development and review of the Healthcare Plan for their child. A request will be sent to parents using Template K;
 - Parents should provide medicines and equipment as required by the Healthcare Plan.
 - Parents should
 - bring their child's medication and any equipment into school at the beginning of the school year;
 - replace the medication before the expiry date;
 - as good practice, take into school the new asthma reliever inhaler when prescribed;
 - dispose of expired items to a pharmacy for safe disposal;
 - during periods of high pollen count, encourage their children, who have been prescribed anti-histamines, to take their medication before school so that their condition can be better controlled during the school day;
 - keep their children at home when they are acutely unwell;
 - Parents should ensure that they or another nominated adult are contactable at all times

3 STAFF TRAINING AND SUPPORT

- The Headteacher will ensure that all staff are aware of the school's policy for supporting pupils with medical conditions and their role in implementing the policy.
- Any member of staff who agrees to accept responsibility for administering prescribed medicines to a child does so voluntarily and will have appropriate training and guidance.
- Training needs will be identified during the development or review of individual healthcare plans and will be reviewed annually. The family of a child will often be key in providing relevant information to school staff about how their child's needs can be met, and parents will be asked for their views but will not be the sole trainer.
- Training will be provided for staff to ensure that they are competent and have confidence in their ability to support pupils with medical conditions, and to fulfil the requirements as set out in individual healthcare plans. Training for new staff will be provided on induction;
- Training will be provided by an appropriate healthcare professional so that staff have an understanding of the specific medical conditions they are being asked to deal with, their implications and preventative and emergency measures so that they can recognise and act quickly if a problem occurs. Template G may be used to confirm staff training.
- Only staff with appropriate training will give prescription medicines or undertake healthcare procedures. (A first-aid certificate does not constitute appropriate training in supporting children with medical conditions).

- The school will ensure that at least three people have attended Supporting Pupils with Medical Conditions training to understand County policy and to ensure medicines are appropriately managed within the school.

4 INDIVIDUAL HEALTHCARE PLANS (Template A)

A Healthcare Plan clarifies for staff, parents and the pupil the support that can be provided. Individual Healthcare Plans for pupils with medical conditions, (e.g. asthma, anaphylaxis, diabetes, epilepsy) will be drafted with parents/pupils and other healthcare professionals where appropriate. The plan will include:

- the medical condition, its triggers, signs, symptoms and treatments;
- the pupil's resulting needs, including medication (dose, side effects and storage) and other treatments, time, facilities, equipment, testing, access to food and drink where this is used to manage their condition, dietary requirements and environmental issues e.g. crowded corridors, travel time between lessons;
- specific support for the pupil's educational, social and emotional needs – for example, how absences will be managed, requirements for extra time to complete exams, use of rest periods or additional support in catching up with lessons, counselling sessions;
- the level of support needed (some pupils will be able to take responsibility for their own health needs) including in emergencies. If a pupil is self-managing their medication, then this will be stated with appropriate arrangements for monitoring;
- who will provide this support, their training needs, expectations of their role and confirmation of proficiency to provide support for the pupil's medical condition from a healthcare professional; and cover arrangements for when they are unavailable;
- who in the school needs to be aware of the pupil's condition and the support required;
- arrangements for written permission from parents and the Headteacher for medication to be administered by a member of staff, or self-administered by the pupil during school hours;
- separate arrangements or procedures required for school trips or other school activities outside of the normal school timetable that will ensure the pupil can participate, e.g. risk assessments;
- where confidentiality issues are raised by the parent/child, the designated individuals to be entrusted with information about the child's condition; and
- what to do in an emergency, including whom to contact, and contingency arrangements.

Some pupils may have an emergency healthcare plan prepared by their lead clinician that could be used to inform development of their individual healthcare plan.

Healthcare Plans will be reviewed at least annually but some may need to be reviewed more frequently. Where appropriate the Healthcare Plan will be reviewed at the pupil's Annual Review.

5 THE PUPIL'S ROLE IN MANAGING THEIR OWN MEDICAL NEEDS

- After discussion with parents, pupils who are competent will be encouraged to take responsibility for managing their own medicines and procedures. Parents will be asked to sign Template F to acknowledge that their child is mature and responsible to manage their own medication. This information will be recorded in the Healthcare Plan.
- Parents should be aware that if their child holds their own medication then school staff will not be recording the doses self-administered;
- If it is not appropriate for a child to self-manage, then relevant staff will help to administer medicines and manage procedures for them; a record of administration will be made.
- If a pupil refuses to take medicine or carry out a necessary procedure, staff will not force them to do so but will contact the parents and follow the procedure agreed in the individual healthcare plan.
- Parents will be contacted where a pupil is seen to be using their asthma inhaler more frequently than usual as this may indicate their condition is not well controlled.
- Children's inhalers are kept in their class medical rucksack which is held in the classroom.

6 MANAGING MEDICINES ON SCHOOL PREMISES

Pupils will only be given prescription or non-prescription medicines after parents have completed a consent form (Template B) – (except in exceptional circumstances where the medicine has been prescribed to the child without the knowledge of the parents. In such cases the school will encourage the pupil to involve their parents while respecting their right to confidentiality).

When no longer required, medicines will be returned to the parent to arrange for safe disposal. Sharps boxes will be used for the disposal of needles and other sharps.

Medicine brought into school must be given to the first aider at the school office.

- 6.1 Prescribed medication** the school will only accept prescribed medicines that are in-date, labelled, provided in the original container as dispensed by a pharmacist and include instructions for administration, dosage and storage. The exception to this is insulin which must still be in date, but will be available inside an insulin pen or a pump, rather than in its original container
- Parents should note the expiry date so that they can provide a new prescription as and when required.
 - Medicines will only be administered at school when it would be detrimental to a child's health or school attendance not to do so.
 - Where clinically possible, medicines should be prescribed in dose frequencies which enable them to be taken outside school hours.

Short-Term Medical Needs

Many children will need to take medicines during the day at some time during their time in the school. This will usually be for a short period only, perhaps to finish a course of antibiotics, which will minimise the time that they need to be absent.

Antibiotics prescribed three times a day can be taken out of the school day. The school will support children who have been prescribed antibiotics that need to be taken **four** times day.

It is the parent's responsibility to bring and collect the antibiotic each day and to complete the necessary forms prior to medicine being administered. All medicines must be signed in and out by a parent.

Any prescribed medicines will be handed over to the ASC by the designated person and signed in using their procedures.

6.2 Controlled Drugs

- Some medicines prescribed for pupils (e.g. methylphenidate, known as Ritalin) are controlled by the Misuse of Drugs Act, 1971. A pupil who has been prescribed a controlled drug may legally have it in their possession if they are competent to do so, but passing it to another pupil for use is an offence.
- The school will keep controlled drugs in a locked non-portable container, to which only named staff have access but will ensure they are easily accessible in an emergency.
- School staff may administer a controlled drug to the child for whom it has been prescribed in accordance with the prescriber's instructions. Office staff have access to the controlled drug cabinet and have agreed to administer medication and have received training.
- A record will be kept of any doses used and the amount of the controlled drug held in school, i.e. total number of doses (tablets) provided to the school, the dose given and the number of doses remaining.
 - where the dose is half a tablet then this will be cut using a tablet cutter at the time that the medication is required;
 - half tablets will be retained but not issued at the time of the next dose; a fresh tablet will be cut;
 - half tablets will be returned to the parent for disposal.
- A controlled drug, as with all medicines, will be returned to the parent when no longer required to arrange for safe disposal. If this is not possible, it will be returned to the dispensing pharmacist.
- Some pupils with epilepsy are prescribed rectal diazepam or buccal midazolam. Templates H or I will be used to gain authorisation for administration from parents.

6.3 Non-prescription Medication

Primary Schools

Non-prescription medication will only be given in exceptional circumstances and only with the expressed permission of the Headteacher. An exception may be made for school residential visits.

The school keeps Calpol and liquid Piriton to administer on an ad-hoc basis during the school day, however, we always obtain written consent prior to giving any medicine to a child. This often relieves symptoms, whilst the parent is en-route to collect. Parents will be contacted if their child has a fever. If pupils require medication to control hay fever symptoms then parents will be asked to take their children to their GP for a formal diagnosis and advice on appropriate medication.

Any non-prescription medicines are administered as and when required with the written permission of the parent

Parents will be asked to sign a consent form confirming that the medicine has been administered without adverse effect to the child in the past and that they will inform the school immediately if this changes.

6.4 Pain Relief

Pupils sometimes ask for pain relief (analgesics) at school, i.e. paracetamol tablets or liquid.

Primary School

- Pain relief will only be given with the expressed consent of the Headteacher for example, for pupils returning to school after sustaining a fracture, dental treatment or older girls with dysmenorrhoea (painful periods).
- Parents will be asked to sign a consent form when they bring the medicine to school, which confirms that they have given the medicine to their child without adverse effect in the past and that they will inform the school immediately if this changes.
- The school will only administer paracetamol to those pupils requesting analgesics; generally non-prescription ibuprofen will not be given.
- If ibuprofen is the analgesic of choice then parents will be advised that a dose could be given before school (ibuprofen is effective for six hours); if required the school will 'top up' the pain relief with paracetamol.
- A child under 16 will never be given aspirin-containing medicine unless prescribed by a doctor.
- When a pupil requests pain relief staff will first check maximum dosages and when the previous dose was taken. Parents will be contacted for confirmation and consent. If parents are unavailable, medicine will not be given.
- A record will be made of all doses given using either Template D or E.

7 RECORD KEEPING

- The school will keep a record of all medicines administered to individual pupils, using Templates D or E stating what, how and how much was administered, when and by whom in a stapled booklet. Any side effects of the medication to be administered at school will be noted.
- A second person will witness the administration of all medicines including controlled drugs.
- A record of administration of medicine will not be recorded where the pupil has taken responsibility for their own medication, e.g. asthma inhalers and take their medication, as and when it is required.
- A record will be made where medication is held by the school but self-administered by the pupil.

8 SAFE STORAGE OF MEDICINES

- Medicines will be stored strictly in accordance with product instructions - paying particular note to temperature and in the original container in which dispensed.
- Pupils know where their medication is stored and are able to access them immediately or where relevant know who holds the key.

- Medicines and devices such as asthma inhalers, blood glucose testing meters and adrenaline pens are always readily available and not locked away.
- A few medicines require refrigeration. They will be kept in a clean storage container, clearly labelled, and stored in the Staff Room refrigerator, which is not accessible to pupils. A temperature log of the refrigerator will be taken during the period of storage.
- Medication will never be prepared ahead of time and left ready for staff to administer.
- An audit of pupil's medication will be undertaken every half term disposing of any medication that is no longer required.
- It is the parent's responsibility to ensure their child's medication remains in date. The school will remind parents when their child's medication is due to expire.

9 DISPOSAL OF MEDICINES

- Parents are responsible for ensuring that date-expired medicines are returned to a pharmacy for safe disposal. The return of such medicines to parents will be recorded;
- Parents should also collect medicines held at the end of the summer term. If parents do not collect all medicines, they will be taken to a local pharmacy for safe disposal;
- Sharp boxes will always be used for the disposal of needles.

10 HYGIENE AND INFECTION CONTROL

All staff should be familiar with normal precautions for avoiding infection and follow basic hygiene procedures.

8 STEP HAND WASHING TECHNIQUES

11 DAY VISITS, RESIDENTIAL VISITS AND SPORTING ACTIVITIES

- The school will actively support pupils with medical conditions to participate in school trips and visits or in sporting activities;
- The school will make reasonable adjustments for the inclusion of pupils in such activities;

- Some children may need to take precautionary measures before or during exercise, and may need access, for example, to asthma inhalers. Staff supervising sporting activities will be made aware of relevant medical conditions, and will consider the need for a risk assessment to be made.
- The school will consider the reasonable adjustments that can be made to enable pupils with medical needs to participate fully and safely in visits. These arrangements will be included in the risk assessment for the event.
- One member of staff accompanying the visit will be asked to take on the lead role for administering medicines or healthcare procedures. Individual Healthcare Plans, medicines, equipment and consent forms will be taken on school visits.
- Medicines are administered and witnessed and recorded on a copy of Templates D or E. This form is added to the file on return from the visit.

12 SCHOOL'S ARRANGEMENTS FOR COMMON CONDITIONS

12.1 Asthma

- An inventory of all pupils with asthma will be compiled;
- An individual Healthcare Plan will be developed;
- All staff undertake training every three years, to recognise the symptoms of an asthma attack and know how to respond in an emergency following the guidance in Templates O and P;
- Children who have reliever inhalers will speak to a member of staff as and when they require it. All the inhalers are stored in the class medical rucksack held in the classroom and are clearly labelled with the child's name. As and when it is administered, the dosage is written on the administration of medicines record book which is kept in the class medical rucksack in the classroom.
- Class rucksacks accompany the children outside at breaktimes and to PE lessons.
- Emergency salbutamol inhalers and spacers are kept in the back office in the white medical locker.
- Emergency salbutamol inhalers will only be given to pupils previously diagnosed with asthma whose reliever inhaler is not in school or whose inhaler has run out, who are on the register and whose parents have signed the consent form;
- All staff will know how and when to use the emergency salbutamol inhaler
- Parents will be asked to sign an 'Emergency Use of School Inhaler' form giving permission for school to administer an emergency dose(s);
- Parents will be informed of any emergency dosages given by Class Dojo, phone or email.

12.2 Anaphylaxis (Severe Allergic Reaction)

- All staff will undertake training every three years on the symptoms of anaphylaxis, which includes information on when and how to use the adrenaline auto-injector.
- An individual Healthcare Plan will be developed which includes the arrangements the school will make to control exposure to allergens;
- Auto-injectors will be kept readily available in the class medical rucksack kept in the classroom;
- Children who require epi-pens in school have their own prescribed epi-pens that are named and kept in individual bags in the class medical rucksack held in the

classroom. The first aider is trained to administer this for the child as required. Records of any administration is kept in the Record book in the class medical rucksack.

12.3 Epilepsy

- An individual Healthcare Plan will be developed;
- An appropriate number of staff will be trained in identifying the symptoms and triggers for epilepsy, including administering medication
- There will be a trained member of staff available **at all times** to deliver emergency medication. Details will be recorded on the pupil's Healthcare Plan.
- A medical area will be available so that if needed the pupil will be able to rest following a seizure, in a safe supervised place.
- The school will offer support with a mentoring or buddying system to help broaden an understanding of the condition;
- The school will enable students to take a full part in all outings and activities,
- The school will make necessary adjustments e.g. exam timings, coursework deadlines, timetables.
- The school will liaise fully with parents and health professionals;
- Some pupils with epilepsy are prescribed rectal diazepam or buccal midazolam. This will be administered by staff who are specifically trained to undertake this task and have agreed to this responsibility.
- The administration of medication will be recorded on Template H or I as appropriate.
- Two adults will be present for the administration of rectal diazepam, at least one being of the same gender as the child. The dignity of the pupil will be protected as far as possible, even in an emergency;
- If appropriate, a record will be kept of the pupil's seizures, using Template N, so that any changes to seizure patterns can be identified and so that this information can be shared with the pupil's parents and healthcare team.
- All medication is named and kept in the class medical rucksack held in the classroom. There are clear guidelines for the procedure on Medical Alerts on the staffroom noticeboard, in the class medical rucksacks and on the Health Care Plans.

12.4 Diabetes

- An individual Healthcare Plan will be developed;
- Pupils diagnosed with Type 1 diabetes and who have been prescribed insulin will be supported by staff who have specifically agreed to this responsibility and have received training and support from the Diabetic Nurses Team.
- A suitable private place will be provided for pupils to carry out blood tests and administer doses, e.g. Medical area;
- Pupils will not be prevented from eating drinking or taking toilet breaks whenever they need to in order to manage their medical condition effectively.
- If a pupil has a hypo, they will not be left alone; a fast acting sugar, such as glucose tablets, a glucose rich gel, or a sugary drink will be given immediately.

- Once the pupil has recovered, slower acting starchy food, such as a sandwich or two biscuits and a glass of milk, will be given, some 10-15 minutes later.

13 ATTENDANCE

13.1 Children who cannot attend school because of health needs

The school's approach is based on the following legislation:

- The Education Act 1996 <https://www.legislation.gov.uk/ukpga/1996/56/contents>
- The Education (Pupil Registration) (England) Regulations 2006 <https://www.legislation.gov.uk/uksi/2006/1751/contents/made>
- Alternative Provision Guidance <https://www.gov.uk/government/publications/alternative-provision>
- Arranging provision for children who cannot attend school [Arranging education for children who cannot attend school because of health needs](https://www.gov.uk/government/publications/alternative-provision)

We also follow guidance provided by our local authority. <https://www.buckinghamshire.gov.uk/schools-and-learning/school-attendance-and-supporting-children-in-education/home-tuition-and-hospital-teaching-services-guidance/50-school-responsibilities/>

13.2 Responsibilities of the school

- At all times the pupil remains the responsibility of the school where they are on roll.
- The designated member of staff responsible for dealing with pupils who are unable to attend school because of medical needs is Zafra Bendall.
- Where a pupil is known to have potentially long-term sickness or recurrent bouts of chronic sickness involving periods of absence, the designated teacher will contact the Community Paediatrician in order to discuss the management of continuing education, including referral to the Home Tuition Service if the school hasn't made other arrangements to deliver suitable education outside of school and this is needed to ensure the child receives suitable education.
- Through regular communication and forward planning, unnecessary gaps in education can be avoided. In every case, the designated teacher will inform parents and carers that other professionals are being consulted about their child's absence from school.
- The designated teacher will take responsibility for supplying the Home Tuition Service with information about the pupil's capabilities, progress and programme of work. The school will be active in the monitoring of progress during absence from school, in liaising with other agencies and in the pupil's reintegration.
- In cases of unpredictable, acute episodes of health needs resulting in absences from school of more than 15 days, the designated teacher should liaise with appropriate medical professionals as soon as possible to establish whether referral to the Home Tuition Service is appropriate.
- The school will ensure that pupils, absent from school because of medical needs, are kept informed about school social events and that they are able to participate as fully as possible in the life of the school, for example in homework clubs, study support and liaising with peers through visits and videos.

In particular, the school will:

- Liaise with the Home Tuition Service, in particular provide prompt up-to-date information about records of achievement and the curriculum.
- Ensure that suitable programmes of work are available to pupils receiving home tuition/hospital teaching, that these are consistent with what the pupil would normally be studying whilst at school and that they take account of the pupil's views.
- Where appropriate, provide resource material to support the programmes of work for the pupil where possible.
- Make appropriate contributions to the cost of providing home tuition. The Home Tuition Service will seek a weekly charge equivalent to one-thirty-eighth of the appropriate age weighted pupil unit for pupils of statutory school age, plus pupil premium where this is applicable.
- Meet all examination fees on behalf of the pupil.
- Make arrangements for 11-plus, National Curriculum Assessments, GCSEs, A/AS levels and any other examinations/accreditations.
- Provide the funding for invigilators to ensure completion of any external examinations where it is not possible for the pupil to complete the assessment within the school or PRU. Invigilation of exams will be funded by the school where the pupil is on roll.
- Maintain contact with the pupil and their family.
- Take part in planning and review meetings, especially those called to organise reintegration at school.
- Where possible, the child's health needs should be managed by jointly by the school and parents so that they can continue to be educated with support, and without the need for the intervention of the local authority.

13.3 If the local authority makes the arrangements

- If the school cannot make suitable arrangements, or if it is clear that a child will be away from school for 15 days (consecutive or over the course of the year) or more because of their health needs, Buckinghamshire Council will become responsible for arranging suitable education for these children.
- When the local authority arranges alternative education, the education should begin as soon as possible, and at the latest by the 6th day of the child's absence from school.
- Where full-time education is not in the child's best interest for reasons relating to their physical or mental health, the local authority must arrange part-time education on whatever basis it considers to be in the child's best interests.

In cases where the local authority makes the arrangements, our school will:

- Provide to the local authority, at agreed intervals, the full name and address of any pupils of compulsory school age who are not attending school regularly due to their health needs
- Work constructively with the local authority, providers, relevant agencies and parents/carers to ensure the best outcomes for the child
- Collaborate with the local authority to ensure continuity of provision and consistency of curriculum, including making information available about the curriculum
- Along with the local authority, regularly review the provision offered to ensure it continues to be appropriate for the child and that it is providing suitable education
- Share information with the local authority and relevant health services as required

- When a child has complex or long-term health issues, work with the local authority, parents/carers and the relevant health services to decide how best to meet the child's needs (e.g. through individual support, arranging alternative provision or by them remaining at school, being supported at home and back into school after each absence)
- Where possible, allow the child to take examinations at the same time as their peers, and work with the local authority to support this
- Help make sure that the child can be reintegrated back into school successfully
- When reintegration is anticipated, work with the local authority to:
 - Plan for consistent provision during and after the period of education outside the school, allowing the child to access the same curriculum and materials that they would have used in school as far as possible, including through digital resources
 - Enable the child to stay in touch with school life (e.g. through newsletters, emails, digital learning platforms, social media platforms, invitations to school events or internet links to lessons from their school), and, where appropriate, through educational visits
 - Create individually tailored reintegration plans for each child returning to school, which includes extra support to fill any gaps arising from the absence
 - Consider whether any reasonable adjustments need to be made

13.4 Children unable to attend due to Emotionally Based School Non-Attendance (EBSNA)

The school's approach is based on guidance issued by the local authority:

<https://schoolsweb.buckinghamshire.gov.uk/send-and-inclusion/emotionally-based-school-non-attendance-ebnsa-toolkit/understanding-ebnsa-and-managing-non-attendance/practical-guidance-on-managing-ebnsa/?print=true>

The guidance states:

"EBSNA is a term used to identify a group of children and young people who are facing challenges in attending school. EBSNA is apparent where difficulties with attending are the result of emotional factors. Children and young people (CYP) presenting with EBSNA experience significant levels of both physical and emotional distress.

The emotional element of EBSNA is what makes it distinct from other forms of non-attendance (truancy). It is also not 'refusal' to attend (though this term has been used in the past).

Often children want to attend school. It is the overwhelming experience of stress, anxiety and other emotions that make a child feel that they must stay away or 'avoid' school.

It is important to remember that EBSNA is not a diagnosis. There is not one underlying need or collection of needs common to all children and young people who experience EBSNA. The overwhelming emotions, thoughts and feelings that children and young people experience may be the result of many different needs including:

- *underlying special educational needs (SEN),*
- *adverse life experiences,*
- *and developmental needs.*

Researchers describe EBSNA as happening when: “stress exceeds support, when risks are greater than resilience and when ‘pull’ factors that promote school non-attendance overcome the ‘push’ factors that encourage attendance” (Thambirajah et al, 2008: p. 33).”

13.5 School EBSNA Pathway

The school follows the Buckinghamshire School EBSNA Pathway:

1. The school/professional completes the EBSNA Toolkit Appendix 1 and 2 (whole school tools).
2. The child or young person (CYP) is identified as EBSNA*. **For severe non-attendance where a child or young person meets one of the following criteria, go straight to step 4.**
 - Has never attended school
 - Has not attended for more than a term
 - Has below 50% attendance and is known to social care.
3. The School works through the EBSNA Toolkit appendices 3 to 6 to develop a support plan and attempt reintegration.
4. The School/professional submits a request for the child or young person to be discussed at a SEND Forum by emailing EBSA@buckinghamshire.gov.uk. The request must include:
 - [EBSNA Formulation Tool \(Appendix 6\)](#)
 - [EBSNA Consent Form](#)
5. The child or young person will be discussed at the SEND Forum. Possible outcomes include:
 - Agreement to initiate a statutory assessment.
 - The case is referred to the iSEND advisory team (Specialist Teachers, Educational Psychologists and SEND Inclusion Advisors).
 - High-needs funding is agreed.
 - A referral to an alternative provision is made.
 - The case is referred to the Pupil in Missing Education panel.
6. The outcome is shared with the original referrer in the SEND Forum and by email.

14 LIABILITY AND INDEMNITY

The Governing Body will ensure that the appropriate level of insurance is in place for staff providing support to pupils with medical conditions and appropriately reflects the level of risk.

The school will contact their insurers to extend their cover should a medical intervention fall outside the conditions covered by this policy.

14 COMPLAINTS

Parents/pupils should discuss any concerns directly with the school if they become dissatisfied with the support provided. If for whatever reason this does not resolve the issue, they may make a formal complaint via the school's complaints procedure.

15 SCHOOL PROCEDURES FOR ADMINISTERING MEDICINES

- 1 Medicines should be brought to the school office by 9am by parents/carers. The designated member of staff will ask the parent to sign the relevant consent.
- 2 The designated person will check that the
 - medicine is in its original container as dispensed by a chemist and details match those on the form;
 - label clearly states the child's
 - first and last name
 - name of medicine
 - dose required
 - method of administration
 - time/frequency of administration
 - patient information leaflet is present to identify any side effects;
 - medication is in date
- 3 The designated person will log the medicine in the record book and store the medicine appropriately
 - Medicines requiring refrigeration will be kept in the fridge in a clean storage container
 - A daily temperature of the fridge will be taken and recorded.
- 4 The designated person will administer medication at the appropriate time.
- 5 The following procedure will be followed:
 - The pupil will be asked to state their name – this is checked against the label on the bottle, authorisation form and record sheet.
 - The name of the medicine will be checked against the authorisation form and record sheet.
 - The time, dosage and method of administration will be checked against the authorisation form and record sheet.
 - The expiry date will be checked and read out.
 - The medicine is administered.
 - The record sheet is signed by the designated person and the witness
 - Any possible side effects will be noted.
 - The medicine is returned to appropriate storage.
- 6 If a child refuses to take their medicine, staff will not force them to do so. Staff will record the incident and follow agreed procedures (which are set out in the pupil's Healthcare

Plan) and contact parents. If a refusal results in an emergency, the emergency procedures detailed in the Healthcare Plan will be followed.

- 7 If the designated person has concerns about a procedure or a medication that they are being asked to administer they will not administer the medicine, but check with the parents or a health professional before taking further action.
- 8 At the end of the day, parents of pupils prescribed antibiotic medication (four doses a day) should collect their child's medicine from the school office and sign it out. For children staying to the After School Club the designated person(s) will pass antibiotic medicine to the supervisor of the After School Club to return to the parents. The After School Club Supervisor will sign and date the back of the authorisation form to confirm that they have received the medicine and accept responsibility to return it to parents.

Policy adopted from BCC and reviewed May 2024.
It is due to be reviewed on September 2027.
